to Palm Oil

## Palm Oil

**"Destroying rainforest for economic gain is like burning a Renaissance painting to cook a meal." E. O. Wilson**

### WHAT IS PALM OIL?

Palm oil is a type of edible vegetable oil that is derived from the palm fruit, mainly grown in Africa & Asia, but also now in North and South America, with 85% of all palm oil globally produced and exported from Indonesia & Malaysia.

The most popular form is vegetable oil. It is used in everything from food products to detergents to cosmetics and increasingly... biofuel.

Worldwide demand for palm oil is expected to double by 2050 to 240 million tons. This rapid demand comes at the expense of tropical forests, which form critical habitats for a large number of endangered species, including Orangutans. It also impacts soil erosion, air pollution, water pollution and climate change.

### HOW IS OMNIIO SUPPORTING THIS CAUSE

As part of Omniio's core values, we are committed to the environment. Therefore, Palm Oil (or any genetically modified version of Palm Oil) will NEVER be a part of our manufacturing processes and formulations.

Omniio takes great pride in the world we live in and will continue to do our part to save it. We ask that you join in too!

### LEARN MORE

Visit our "Say No to Palm Oil" page to learn which companies use Palm Oil and those that are starting to take a stand against it.

### WHAT CAN YOU DO TO HELP?

**Step 1** ~ You made the right decision to purchase **O My!**<sup>TM</sup>, whom takes a strong stand against the use of palm oil in the bath & body industry.

**Step 2** ~ Continue to make smart buying decisions by taking the time to read ingredient labels of products you are thinking about buying. If the labels include "Palm Oil", **please DO NOT PURCHASE!** Nowadays, there are many buying options for any given product.
